LAB TASK 08

Name: Hafiz Abdullah Shakeel

Sap I'D: 72405

Subject: Object Orientated
Programming

Teacher: Sir Imran Khan

Task 1:

```
package com.mycompany.lab8;
import java.util.Scanner;

public class Lab8 {

    public static void main(String[] args) {
        Scanner s = new Scanner(System.in);

        System.out.println("Hafiz Abdullah Shakeel");
        System.out.println("72405");

        calculator area = new calculator();

        System.out.println("Enter Side Of Square");
        int side = s.nextInt();
        area.calculateArea(side);

        System.out.println("Enter Length Of Rectangle");
        int length = s.nextInt();
        System.out.println("Enter Width Of Rectangle");
        int width = s.nextInt();
        area.calculateArea(length, width);

        System.out.print("Enter length of rectangle (double): ");
        double dLength = s.nextDouble();
        System.out.print("Enter width of rectangle (double): ");
        double dWidth = s.nextDouble();
        area.calculateArea(dWidth, dLength);
    }
}

package com.mycompany.lab8;
public class calculator {

    public void calculateArea(int length, int width) {
        System.out.println("Area of rectangle: " + (length * width));
    }

    public void calculateArea(int side) {
        System.out.println("Area of square: " + (side * side));
    }

    public void calculateArea(double width, double length) {
        System.out.println("Area of rectangle (double): " + (width * length));
    }
}
```

Task 2:

```
package com.mycompany.lab82;
import java.util.Scanner;
public class Lab82 {

    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);

        System.out.println("Name: Hafiz Abdullah Shakeel");
        System.out.println("Sap: 72405");

        calculator calc = new calculator();

        System.out.print("Enter two integers: ");
        int x = sc.nextInt();
        int y = sc.nextInt();
        calc.add(x, y);

        System.out.print("Enter three integers: ");
        int p = sc.nextInt();
        int q = sc.nextInt();
        int r = sc.nextInt();
        calc.add(p, q, r);

        System.out.print("Enter two decimal values: ");
        double d1 = sc.nextDouble();
        double d2 = sc.nextDouble();
        calc.add(d1, d2);
    }
}
```

```
package com.mycompany.lab82;
public class calculator {
    public void add(int a, int b) {
        System.out.println("Sum of integers: " + (a + b));
    }
    public void add(int a, int b, int c) {
        System.out.println("Sum of three integers: " + (a + b + c));
    }
    public void add(double a, double b) {
        System.out.println("Sum of doubles: " + (a + b));
    }
}
```
